<b>168 Bellmawr Boro, Drainage</b>	<b>02406</b>	<b>02406</b>

Flooding is experienced along Route 168 within the vicinity of Beaver Brook, a branch of Big Timber Creek. During rainfall events, highway runoff is not able to drain out due to build up and tidal influences of Beaver Brook. The highway and adjacent areas of the brook are at elevations below or close to the stream elevation. Due to these conditions, backwater effects flood the highway and upstream areas. This project will recommend alternatives for this problem.

This project will provide for construction of a new storm drainage system within the project limits. New inlets and pipes will be constructed along Clements Bridge Road. Two outfalls will be constructed in this project which includes stream stabilization and scour holes. Also, improvements will include a connection to pumped discharge from a business located within the project area in order to stop further damages to roadway pavement. Due to the nature of this project, no consideration has been given to bicycle/pedestrian accommodations.

This is a multi-year funded project under the provisions of Section 13 of P.L. 1995, c.108.
